

On the Graovac–Ghorbani index of bipartite graphs

Barbara Ikica

Faculty of Mathematics and Physics,
University of Ljubljana

29 September 2016

On the
Graovac–Ghorbani
index of bipartite
graphs

Barbara Ilica

Chemical compounds:

- physicochemical,
- pharmacological,
- toxicological properties ...

Graphs:

- vertex degrees,
- vertex neighbourhoods,
- number of vertices/edges ...

Molecular descriptors

*The **molecular descriptor** is the final result of a logic and mathematical procedure which transforms chemical information encoded within a symbolic representation of a molecule into a useful number or the result of some standardized experiment.*

*A **topological index** also known as a **connectivity index** is a type of a molecular descriptor that is calculated based on the molecular graph of a chemical compound. [Todeschini and Consonni, 2000]*
